

Noteworthy Words of Magnitude!

You will be keeping track of important vocabulary words that pertain to chapter/unit items within the cards provided. In doing so, this can be used as a reference tool throughout the chapter and school year as we continue to grow as a scientifically literate citizen.

The card format is as follows:

- **Oval** – write the vocabulary word
- **Definition** – attempt to put the definition in your own words
- **Facts/Characteristics** – this can be in words or a picture/diagram to aid your understanding
- **Example** – provide an example of the word in use
- **Non-example** – make a list or mention what the word is not or misconceptions in regards to it. For example, if you have an Aves (bird) written in the middle as a vocabulary word, this item would not be a bat or insect and therefore it would be a non-example.
